[How to Calculate the Current Market Price of a Bond](#) ...

Multiply the face value of the bond by the present value of \$1 factor, which is found on the present value of \$1 table (see Resources), to calculate the present value of the bond's face value. In our example, use 8 percent for 10 periods on the present value of \$1 table, which equals 0.4632. Therefore, \$200,000 times 0.4632, equals \$92,640 as the present value of the bond's face value.

[How to Calculate the Market Value of Bonds - Budgeting Money](#)

[How to Calculate the Market Value of Bonds](#) The market value of a bond has two parts: The value of the amount of the bond itself, or its face value, and the value of the interest you would receive if you held on to the bond until it matures.

[Bonds Market value, Current Price, Finance Basics, Cash ...](#)

The general idea. As mentioned in a previous article market value is the present value of the expected cash-flows. Normally a bond's cash-flow consists of periodically received interest and at maturity a one time payment of the face value.

[What is the value of a bond? | Calculators by CalcXML.](#)

Bond values are very sensitive to market interest rates. For example, if you purchased bond with a stated/coupon rate of 10% and market rates had declined to 8% since you purchased the bond, then the value of your 10% bond in a market crediting 8% would be higher. Use this calculator to help determine the value of a bond.

[How to Calculate the Fair Market Price of a Bond Yield to ...](#)

The current market price of your bond is the dollar amount of its current face value plus the dollar amount of its remaining interest payments. There's a little work involved in determining current market price but if you use the accounting tools available online, it will only take a few minutes.

[Chapter 4 Valuing Bonds Flashcards | Quizlet](#)

The yield to maturity (YTM) is simply the discount rate that equates the present value of a bond's future cash flows to its current market price.<sup>3</sup> As a general rule, when a bond's coupon rate exceeds its YTM, the bond will trade at a premium as Worldwide's bonds do.
