Greenhouse - Solar Heated

Some ideas I got off of YouTube and the net. This winter will be the true test.

Solar Heated Greenhouse

An active/passive solar heated greenhouse for growing vegetables, house plants, bonsai trees, etc. In the cold of winter.

Storing excess daytime solar energy to heat greenhouse at ...

Storing excess daytime solar energy to heat greenhouse at night! Russell has a unique and effective system for heating his greenhouse. On sunny days, the system takes excess heat from the peak of the greenhouse that would normally just be vented outside and uses a water to air heat exchanger to transfer this this heat to a large water tank.

Solar Greenhouse Heat Sink | REUK.co.uk

The solar panel charges the battery which in turn drives a small recycled PC cooling fan (shown above) 24 hours per day. The fan sucks air in from the top (apex) of the greenhouse where the air is hottest and pumps it through the 38mm standard PVC waste pipe into the base of the heatsink hole.

Solar Heating for your DIY Greenhouse | The Do It Yourself ...

While your first thought on hearing about the idea of using solar energy to heat your greenhouse may be one of expensive panels, batteries and heating elements; simple, cheap and time tested methods do exist to help out the gardener on a budget.

How To Build A Solar Greenhouse | Permaculture magazine

Another solar panel charges a 12V, 12 amp-hour leisure battery which powers the fans at night when the temperature falls below a set point. (An inexpensive charge regulator is included to prevent overcharging, but is not strictly necessary.) A simple bimetallic switch made from a winemaking thermostatic heater determines the temperature at which the fans switch on at night to pump warmer air into the greenhouse (generally set to about 6-7 C).
