In 2017, some 86.95 billion U.S. dollars worth of commercial real estate were built in the United States.

[How to Determine the Terminal Value of Commercial Real ...](#)

There are two problems with this approach: First, you're assuming the current value estimate of the commercial real estate property is just right, meaning neither too high nor too low; and second, that there will be steady and constant growth in its value until the terminal year. These assumptions are unlikely to hold over a long period of time. For these reasons, an alternative approach is often used.
